

H2Pro[®]

AquaSmart

Smart water-use efficiency for top performance all summer

Description

H2Pro AquaSmart is a premium outfield wetting agent. It improves your turf's water use efficiency through those dry summer months, reducing appearance of localised dry patch and assisting with rewetting after dry spells. With its low rate of application, it also gives you great value for money.

Benefits

- \\ Maintains turf quality under dry conditions
- \\ Enhanced outfield area water use efficiency
- \\ Prevents and remedies dry patch

Application rates

Recommended Rate:

5-10L /ha

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

How to use

- 1 For best results apply 3 to 4 times through the summer.
- 2 H2pro wetting agents can be applied, tank mixed with other ICL products, check tank mix table for compatibility.
- 3 Contact your local ICL representative for more information.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
